

Ideation Phase Brainstorm & Idea Prioritization Template

Date	29 June 2026
Name	HARRI VENDHAN L
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	4 Marks

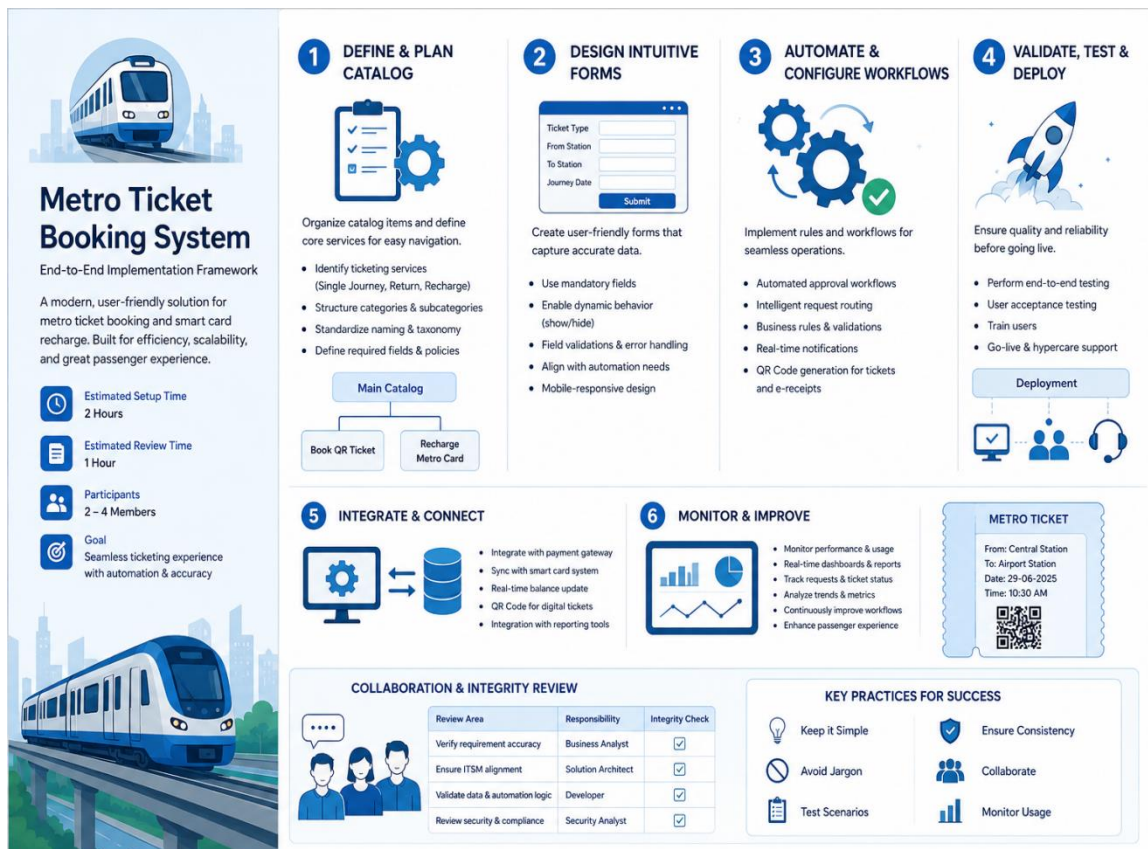

Brainstorm & Idea Prioritization Template:

Brainstorming is a creative technique used to generate innovative ideas and solutions by encouraging open discussion and collaboration among team members. In the development of the **Metro Ticket Booking System using ServiceNow**, brainstorming helps identify challenges faced by passengers in booking metro tickets and managing smart card services while exploring effective ways to automate the entire ticketing process. Team members are encouraged to share ideas freely without criticism, allowing a wide range of possible solutions to emerge.

Through brainstorming sessions, various concepts such as **QR ticket generation, smart card recharge, automated workflow execution, passenger information management, fare calculation, secure payment processing, metro station selection, QR code validation, and real-time ticket management** can be explored and refined. By focusing on collaboration and creativity, the team can develop an efficient and user-friendly solution that reduces manual effort, improves passenger convenience, enhances service efficiency, and provides a seamless digital metro ticket booking experience through the ServiceNow platform.
