

Project Design Phase
Proposed Solution Template

Date	29 June 2026
Name	HARRI VENDHAN L
Project Name	Metro ticket generating system in ServiceNow
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Metro passengers often face long queues at ticket counters, delays in ticket booking, manual smart card recharge processes, and the lack of a centralized digital ticketing system.
2.	Idea / Solution Description	A ServiceNow-based Metro Ticket Booking and Smart Card Recharge System that enables passengers to book metro tickets, recharge smart cards, calculate fares automatically, and generate QR code-based digital tickets through a self-service portal. All booking details are stored in the Metro Database using Flow Designer automation.
3.	Novelty / Uniqueness	The solution integrates Service Catalog, Flow Designer, Business Rules, QR Code Generation, and Metro Database into a single automated platform.
4.	Social Impact / Customer Satisfaction	Reduces waiting time at metro stations, promotes cashless and paperless ticketing, improves passenger convenience, enhances travel safety through QR-based verification.
5.	Business Model (Revenue Model)	The system can be deployed by metro authorities as part of their digital services. Revenue is generated through metro ticket sales, smart card recharge transactions, digital service fees, and future integrations with online payment gateways and metro mobile applications.
6.	Scalability of the Solution	Built on the scalable ServiceNow Cloud Platform , the solution can efficiently support thousands of concurrent passengers, multiple metro stations, additional routes, online payment integrations, mobile applications, and advanced analytics with minimal infrastructure changes.
